

- 1** Morrisons agrees with the grower what crops are going to be grown and supplied to Morrisons

- 2** The seeds are planted and the carrots grow

**3** Once the crop is ready, it is harvested

**4** The carrots are transported to a Morrisons Manufacturing site

- 5** The carrots are quality checked on arrival to make sure they meet the specification

- 6** The carrots are washed

## 7 The carrots are polished

## 8 The carrots are graded – this means they are separated into different grades, depending on their specification

- 9** The carrots are packed into retail packs

- 10** The packs of carrots are loaded on to a lorry and transported to a Morrisons distribution centre

- 11** At the distribution centre, the carrots are picked, ready to go to the different Morrisons stores

- 12** The pallets of carrots are then loaded onto a Morrisons lorry, with lots of other goods

**13** The lorry then takes the loads of carrots to Morrisons stores

**14** The carrots arrive at the Morrisons store and are unloaded

- 15** The carrots are put on to display in Morrisons Market Street area of the store

- 16** The customer selects a pack of carrots and pays for them at the checkout, ready to take home to eat!
